

When it comes to efficient PWC storage, we're stacking the deck.

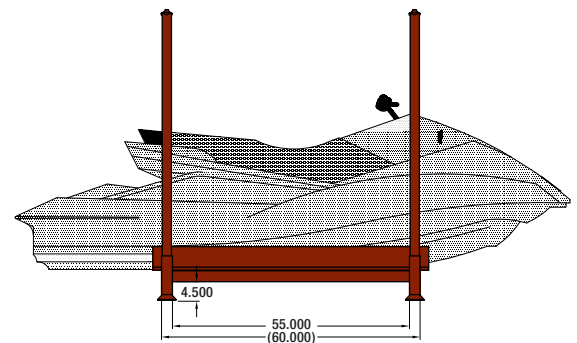

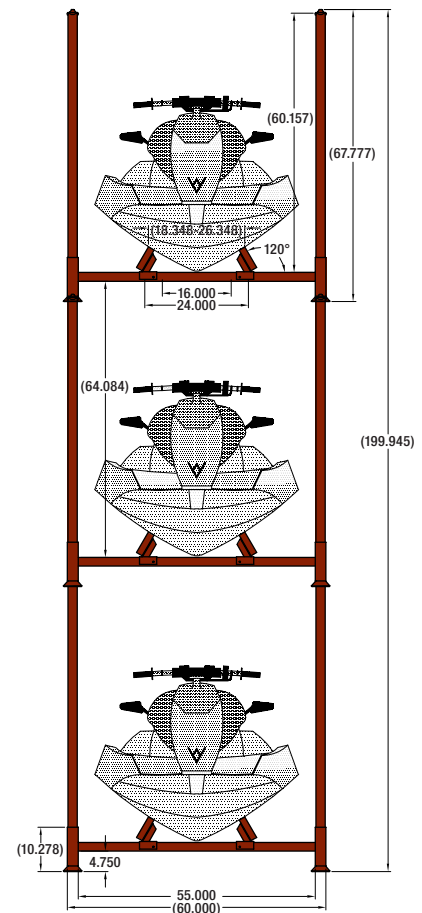

Introducing the Gillis-Jarke PWC Airector by SPG.

There are a million personal watercraft (PWC) in use throughout the USA. Now, SPG offers a simple, efficient and cost-effective way of storing PWCs. The Gillis-Jarke PWC Airector MR-0103-60 maximizes space while making PWC storage easier than ever before.

- This system is **ideal for winter storage and "put in" service**
- With its modular, high-density design you can **stack up to 5 PWCs on one rack**
- The Airector will **increase cube utilization of both indoor and outdoor facilities**
- Posts slip in and out of base sockets for **fast and easy tool-free assembly**
- Its **quick setup and teardown** delivers greater flexibility and requires no permits
- Post tops have "funnel targets" that interlock with base "plugs" for **simple, safe and secure forklift stacking**
- Additional post heights available for **greater versatility**

The Gillis-Jarke PWC Airector is the right choice for marinas, boat dealers, repair and maintenance centers, warehousing, manufacturing, even resort operators.

The marine industry offers a unique sales opportunity for SPG dealers, and the PWC Airector offers a unique storage opportunity to customers. Of course, both our dealers and their customers can always Expect More from SPG.
